

My Folder CONNECTOR

STREAMLINES YOUR BUSINESS PROCESSES

GO BEYOND SCAN TO FOLDER...

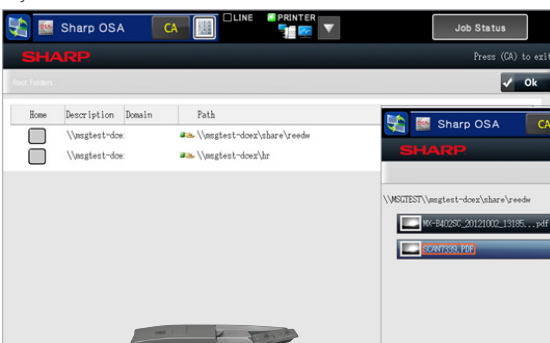

Take document scanning to the next level with the power and extensibility of Sharp OSA® technology. Using Sharp's My Folder Connector, Sharp OSA-enabled Multifunction Products (MFPs) can now become an essential part of business processes in the organization.

You can scan and send your mission critical document to your shared network folder faster and in a more productive way with the My Folder Connector. More conveniently, for IT administrators who want to simplify the scanning process and give users access to the "Home Folders", the Sharp My Folder Connector is the solution.

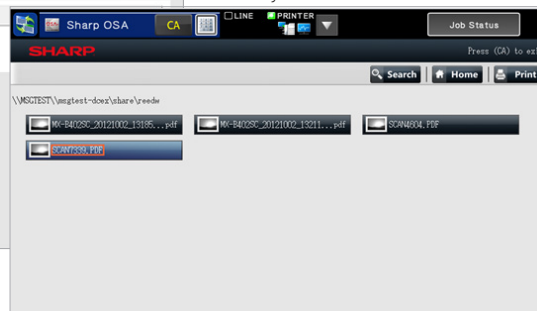

With seamless integration to Microsoft® Active Directory®, authenticated users will have an access to shared network folders right from the operation panel of Sharp OSA-enabled MFPs. For security conscious organizations, network administrators have control of the options displayed on the operation panel through IT-friendly configuration utility. Furthermore, the My Folder Connector supports Microsoft Active Directory login scripts* that automatically map shared drives once authenticated, just like logging on to a Windows® PC.

And now with the updated My Folder Connector, you have exciting new features including PaperCut MF™ Single-Sign-On and Microsoft SQL/SQL Server® support.
